

	Question	Response
1	In reference to the clarification below on Amendment 0005, we have already prepared the elbow patch pleats for the PDM's, as required before. Please confirm if we can use those PDM's and include a note on the COC letter that we will do it correctly when manufacturing, or if we will have to make again the elbow patches without the pleats.	Offerors are advised that PDMs prepared prior to the release of Amendment 0005 may be submitted as constructed provided that the manufacturing differences are noted in the CoC letter and the Offeror states those differences will be corrected for manufacturing purposes.
