14. ABSTRACT The term “manpower and personnel integration” (MANPRINT) was coined in 1984 by General Richard H. Thompson, Commanding General of the U.S. Army Materiel Command. MANPRINT became an official directorate in the Office of the Deputy Chief of Staff for Personnel in 1987. In 1991, MANPRINT was expanded to include Automated Information Systems (AIS). This report is the second edition of this document and references 583 MANPRINT assessments and evaluations performed by the MANPRINT community as required by U.S. Army Regulation 602-2 that were conducted by the U.S. Army between 1953 and the date of this report in 2009. New to this edition are 443 reports regulated by Army Regulation 73-1 and produced by the Army test and evaluation (T&E) community from 1979 that address MANPRINT issues. Covering both of these categories are 1026 assessment reports related to MANPRINT reported in this bibliography that are covered under AR 73-1 and AR 602-2. While the MANPRINT program was officially established in the late 1980s, there had been work in what was to become many of the MANPRINT domains going back many years. Searches of the available archives in various Army organizational databases and files produced study reports from 1953 onward for work for, and related to, the official MANPRINT program and from 1979 onward for T&E-related work. Readers and users of this bibliography are encouraged to contact the author if additional studies and reports are discovered, or are known to exist, so that they can be included in future editions of this work.

Abstract.

The term “manpower and personnel integration” (MANPRINT) was coined in 1984 by General Richard H. Thompson, Commanding General of the U.S. Army Materiel Command. MANPRINT became an official Directorate in the Office of the Deputy Chief of Staff for Personnel (ODCSPER) in 1987. In 1991 MANPRINT was expanded to include Automated Information Systems (AIS)¹.

This report is the second edition of this document and references 583 MANPRINT Assessments and evaluations performed by the MANPRINT community as required by Army Regulation 602-2² that were conducted by the U.S. Army between 1953 and the date of this report in 2009. New to this edition are 443 reports produced by the Army test and evaluation (T&E) community from 1979 that address MANPRINT issues and are regulated by Army Regulation 73-1³. Covering both of these categories there are a total of 1026 assessment reports related to MANPRINT that are reported in this bibliography that are covered under AR 73-1 and AR 602-2.

While the MANPRINT program was officially established in the late 1980's, there had been work in what was to become many of the MANPRINT domains going back many years. Searches of the available archives in various Army organizational databases and files produced study reports from 1953 onward for work for, and related to, the official MANPRINT program and from 1979 onward for T&E related work.

Readers and users of this bibliography are encouraged to contact the author if additional studies and reports are discovered, or are known to exist, so that they can be included in future editions of this work.

1. Introduction.

This section provides a general overview of this bibliography along with comments on how to best utilize it in both its manual and automated forms.

This publication is intended for those MANPRINT practitioners who, for whatever reason, need to know if or what MANPRINT work has been performed on a particular system or system type and when. Also, an inquiry might take the form, '... well, I know that Joe Smith did a study on a like system a few years ago...'. This bibliography also serves this type of inquiry and can provide a reference on which systems have been studied and when. The significance is that when a new system study is being contemplated or started then one of the first things the principal investigator (PI) is interested in is what issues have been identified for this type of system in the past to use as a benchmark to see if the new system is being designed with the same problems in it that historical knowledge has shown to be a problem.

Because of the size this report has been divided into 3 volumes. Volume I, titled the Index, consists of an introduction to the series and a set of table oriented indexes designed to give the reader the ability to focus into a desired past study when only limited, or no, knowledge exists. All the index tables contain the columns of year of the study, short name for the study, long name for the study, and type of study, i.e., a MANPRINT Assessment (MA) or a Test & Evaluation Report (T&ER).

Volume II contains the annotated bibliography of the 583 MA reports reviewed by this paper. MANPRINT Assessments are performed according to the direction of AR 602-2. They consist of an evaluation of all 7 MANPRINT domains and a summary of the findings. The approving authority for these MAs is the DA G1 for MANPRINT. Once the MA has been approved by this office it is used as an input document for ASARC and Milestone Decision Reviews for the system being evaluated. The lead performing organization for MAs is the Human Research and Engineering Directorate (HRED) of the U.S. Army Research Laboratory (ARL). ARL-HRED will perform the MPT and HFE portions of the MA directly and will coordinate with other agencies for the other domain reports as appropriate. ARL-HRED will then consolidate all of the domain reports into a draft MA and forward it to DA G1 - MANPRINT for approval.

Volume III contains the annotated bibliography of the 443 T&ERs reviewed by this paper. A T&ER is a system evaluation performed according to AR 73-1 for all systems in development in the Army except those developed by MEDCOM and SOCOM. The U.S. Army Test and Evaluation Command (ATEC) conducts these evaluations according to AR 73-1 through its subordinate commands the U.S. Army Evaluation Center (AEC), the U.S. Army Development Command (DTC), and the U.S. Army Operational Test Command (OTC). The Test & Evaluation (T&E) process is very structured and typically produces a series of documents related to the system under test that may include (as required) an event design plan (EDP), a test data report (TDR), and a system evaluation report or operational test agency evaluation report (SER before 2008 and OER after 2008).

1.1. Performing Organizations.

MANPRINT studies documented in this report were performed by the following organizations:

- Military Operations Research Society (MORS), Alexandria, VA.
- U.S. Air Force, Air Proving Ground Center, Eglin Air Force Base, FL.
- U.S. Army Aviation Technical Test Center, Fort Rucker, AL.
- U.S. Army Chemical Research and Development Laboratory, Edgewood Arsenal, MD.
- U.S. Army Combat Systems Test Activity (Prov), Aberdeen Proving Ground, MD.
- U.S. Army Directorate of Flight Standards and Qualification Research, St. Louis, MO.
- U.S. Army Dugway Proving Ground, UT.
- U.S. Army Electronic Proving Ground (EPG), Fort Huachuca, AZ.
- U.S. Army Evaluation Analysis Center (EAC), Aberdeen Proving Ground, MD.
- U.S. Army Evaluation Center (AEC), Aberdeen Proving Ground, MD.
- U.S. Army Frankford Arsenal, Philadelphia, PN.
- U.S. Army Human Engineering Laboratory (HEL), Aberdeen Proving Ground, MD.

- U.S. Army Materiel Test and Evaluation Directorate, White Sands Missile Range, NM.
- U.S. Army Natick Research, Development and Engineering Center, Natick, MA.
- U.S. Army Operational Test and Evaluation Command (OPTEC), Alexandria, VA
- U.S. Army Operational Test Command (OTC), Fort Hood, TX.
- U.S. Army Research Institute (ARI) for the Behavioral and Social Sciences. Alexandria, VA.
- U.S. Army Research Laboratory (ARL), Human Research and Engineering Directorate (HRED), Aberdeen Proving Ground, MD.
- U.S. Army Research Office (ARO), Research Triangle Park, NC.
- U.S. Army Test and Evaluation Command (ATEC), Alexandria, VA.
- U.S. Army Troop Support and Aviation Materiel Readiness Command, St. Louis, MO.
- U.S. Navy Air Test Center, Patuxent River, MD.

1.2. Sources of Data.

MANPRINT reports documented in this bibliography came from the following sources:

- Scientific & Technical Information Network (STINET) library of the Defense Technical Information Center (DTIC) web page: <https://dtic-stinet.dtic.mil/>.
- National Technical Information Service (NTIS): <http://www.ntis.gov/>.
- Library archives of the U.S. Army Research Laboratory (ARL), Human Research and Engineering Directorate (HRED), (formerly U.S. Army Human Engineering Laboratory (HEL), Aberdeen Proving Ground, MD.
- Unpublished MANPRINT files at ARL-HRED, Aberdeen Proving Ground, MD.
- Library archives of the U.S. Army Research Institute (ARI), Alexandria, VA.
- ARL Inside Web page: <https://arlininside.arl.army.mil/>.
- ARL Technical Library WEBCAT Web Page: <https://arllit.arl.army.mil/>.
- Library archives at the U.S. Army Operational Test Command (formerly TEXCOM) of the U.S. Army Research Institute at Fort Hood, TX.
- Library archives of the U.S. Army Research Laboratory, Fort Hood Field Element, Fort Hood, TX.
- Library archives of the U.S. Army Research Laboratory, ARDEC Field Element, Picatinny, NJ.
- Library archives of the U.S. Army Research Laboratory, PM SWAR Field Element, Fort Belvoir, VA.
- Library archives of the U.S. Army Research Laboratory, Fort Rucker Field Element, Fort Rucker, AL.

1.3. Document Types.

The reports and documents in this report consist of a variety of formats and types. These are:

1.3.1. Formal published reports from DTIC.

These documents have been published by the originating organization in the appropriate technical report format for that organization and submitted to the DTIC for inclusion in the technical reports national archive. Each of these reports contains a reference to the DTIC control number so it can be accessed by qualified government and other personnel in the archive. A sample of DTIC control number formats is:

- ADA123123 – reports that have no distribution limitations and are available to the general public.
- ADB123123 – reports that are unclassified but have distribution limited to qualified government employees and their contractors.

- ADC123123 – reports that are classified at the confidential or secret level with controlled access. The description of these reports is unclassified as listed in this report, however, the actual report is subject to the distribution controls and access limits as stated in the document.

1.3.2. Formal published technical reports.

These documents have been published in a technical or other report format by the originating organization in the appropriate technical report format for that organization. Typical organizations publishing these types of reports are the U.S. Army Test & Evaluation Command, U.S. Army Research Institute, U.S. Army Research Laboratory's Human Research and Engineering Directorate and the U.S. Army Human Engineering Laboratory before it. These reports have been obtained from the library archives of these respective organizations.

1.3.3. Unpublished reports.

This type of report was not submitted to the DTIC archive by the originating agency and was obtained from the local files of that organization. These reports are primarily from HEL, ARI, and ARL-HRED file archives and may be either full MANPRINT Assessments covering all 7 of the MANPRINT domains or they may cover only one domain such as human factors or safety. Many of these reports contain no distribution instructions. Requests for copies of these reports can be made to the Director ARL-HRED.

1.4. Report availability.

Most of the documents listed in this bibliography can be obtained from multiple sources. All documents with a DTIC control number can be obtained directly from NTIS either as a PDF document that can be downloaded directly, or in hardcopy form for a processing fee. All of the unpublished reports listed in this bibliography can be obtained from ARL-HRED subject to the approval of that agency.

1.5. How To Use This Bibliography.

This report is designed to facilitate both manual use and automated searches of computer databases.

1.5.1. Using the electronic version of the bibliography.

This report is structured so that it can be effectively used in its hardcopy format but it is designed for optimal use in electronic format. Attached to the back cover of Volume I of the hardcopy version of the report is a CD containing all 3 volumes of the bibliography in a single PDF file. This PDF file supports electronic searches to quickly locate a desired study report regardless of how much or how little information is known about the report's date, title, system short or long name, or report type.

In addition, the CD contains a complete library of all known MANPRINT related reference documents and all the regulations, pamphlets, directives, and publications that could be identified as being MANPRINT related. This CD is included with the bibliography to provide the reader with a complete reference of MANPRINT reference materials in addition to the electronic copy of the bibliography. All of the documents in the CD are in full text PDF format.

1.5.2. Using the hardcopy version of the bibliography.

If the PDF version of the bibliography is not available then the reference listings in Volume I can be used to support a manual search for the desired system report(s). The listings in sections 2 and 3 support this type of manual reference search. If all of the reports conducted during a certain year are of interest then the tables in paragraph 2.1 can be used. If only the short name of the system is known then the paragraph 2.2 tables can be used. Paragraph 2.3's tables list all of the reports in order by system short name categorized by system type. Paragraph 2.4's tables list all of the reports in order by the system long name. Finally, if it is desired to find all of the reports from a particular author or investigator then paragraph 3 can be used which lists all of the reports in order by the first author or principal investigator in a standard bibliographic reference format.

The annotated bibliographies for all the reports identified by this publication are in Volume II and Volume III. Volume II contains the annotated references for all of the MANPRINT Assessments developed for the DA G1 for MANPRINT. It is preceded by a one line listing for only these reports in order by System Short Name Categorized, System Short Name, System Long Name, and Year of the report. The annotated bibliography then follows in the same order in the format shown in the Table below.

Volume III contains the annotated references for all of the MANPRINT Assessments developed by the Test & Evaluation community. It is preceded by a one line listing for only these reports in order by System Short Name

Categorized, System Short Name, System Long Name, and Year of the report. The annotated bibliography then follows in the same order in the format shown in the Table below.

If the reader is unable to find the report of interest using these tables, they are then referred to the index in Chapter 5 of Volume I which shows the page numbers from the total 3 volume bibliography for each system reported in the bibliography.

Table: Format of the Annotated Report Listings in this Bibliography

System Short Name: *Type of Report, Short Name by Category of the System*

Reference (*Inline citation for the reference*):

Full reference of the reference in human factors reference format:

Author name- Last name first (year). Title of Study. Institution or agency performing study. Agency Report Number. DTIC report Number

Key Words:

Key words from the study for search purposes.

System Description:

A description of the system evaluated in the study

Report Availability:

Distribution restrictions or limitations of the report. For reports with no limitations this statement is:

Approved for Public Release; Distribution is Unlimited:

1.5.3. Using the bibliography With Endnote™.

This document was prepared with Microsoft Word™ 2007 and the bibliographic database program Endnote™⁴, version X1. Once the information for each MANPRINT report was entered into the Endnote™ database, extracting it in a variety of formats was straightforward and was used to generate all of the lists and abstracts in the report. Endnote™ also supports an extensive database search capability which can be used to find reports for the various systems listed in this bibliography. One feature of Endnote™ is that full text PDF versions of the cited reports can be embedded into the database so that Endnote™ not only supports finding information about a MANPRINT report but can also provide a copy of the report itself. This bibliography is supported by a complete Endnote™ bibliography that has had all of the MANPRINT reports inserted into it. Thus, future researchers using Endnote™ version X1 or later can access the database to not only find out whether a particular system has been evaluated by a MANPRINT study in the past, but also to extract the study itself for reference while embarking on a new version of that system or a new system that is similar to a previous one.

Copies of the Endnote™ version of the MANPRINT bibliography that contains a PDF version of the report, the Endnote™ library, and all of the full documents cited in the bibliography in PDF format can be obtained by MANPRINT practitioners from U.S. government agencies with a request to the Director, Human Research and Engineering Directorate, U.S. Army Research Laboratory, Aberdeen Proving Ground, Maryland 21001.

1.6. Significance of this Bibliography.

One might reasonably question the significance of a MANPRINT study conducted in 1953 to any current system being evaluated. The earliest MANPRINT report in this bibliography is of the T42 tank that was conducted that year. The T42 tank did not even go into production, however, many of the crewstation concerns and findings from that report are valid for any tank design. Thus, any principal investigator initiating a study on a future tank design would certainly have an interest in becoming familiar with human related issues previously identified in earlier tank designs to ensure that they are not repeated in the new design. For this reason, all U.S. Army MANPRINT reports and studies that were found in any archive or file have been included in this bibliography.

1.7. Distribution Restrictions for this Bibliography.

This document has no distribution restrictions and is authorized for public release. It is noted that many of the reports cited in this bibliography do have restrictions on their distribution to U. S. Government agencies, DOD and their contractors, and several are classified at the confidential and secret level. However, none of the findings or

⁴ EndNote. (2008). Endnote, Windows Version X1. Berkeley, CA.: ISI ResearchSoft, Inc.

An Annotated Bibliography of MANPRINT Related Assessments and Evaluations Conducted by the U.S. Army,
2nd Edition: 1953 to 2009. Volume I- Index

procedures in any of the study reports are included in this bibliography which only contains the name of the system that was evaluated, key words related to the system, year of the evaluation, and a description of that system along with the name of the principle investigator who conducted the study. There is, therefore, no restricted information in this bibliography and there are no limits on its distribution.

2. Cross Reference Listings of The Reports in This Bibliography.

This section is designed to facilitate locating the annotated bibliographic reference for the system of interest and contains listings of the reports in the bibliography that can be used to determine if a study has been performed for the system of interest or one similar to it. For example, if a MANPRINT principal investigator is desiring to determine if any type of MANPRINT analysis has been performed for a certain system in the past they would be interested in finding a copy of that previous work to learn of prior problems and recommended solutions that had been previously identified. If the electronic version of this bibliography is available then an electronic search of the PDF files can quickly determine if the system had been previously studied and then see the full annotated listing for that study containing the names of all the authors, a description of the system, distribution restrictions, if any, for the system, and sources to obtain a copy of the report.

2.1. Listing In Order by Year- Short Name- Short Name by Category- Long Name.

Report List Ordered by Year- Short Name- Short Name Categorized- Long Name				
Type	Year	Short Name	Short Name Categorized	Long Name
MA	1953	T42 Tank	Vehicle- Tracked- Tank- T42 Tank	Tank, 90mm Gun, T42
MA	1956	Jeep-XM151	Vehicle- Wheeled- Utility- Jeep- XM151	Truck, 1/4 Ton, 4x4, XM151 (Jeep)

- Gunn, K. (1994). Manpower and Personnel Integration (MANPRINT) Assessment for the Cartridge, 120mm, Armor Piercing, Fin Stabilized, Discarding Sabot - Tracer (APFSDS-T), M829a2. Unpublished Report. U.S. Army Research Laboratory, Attn: AMSRD-ARL-HR, Human Research and Engineering Directorate, Aberdeen Proving Ground, Maryland.
- Gunn, K. (1999). Manpower and Personnel Integration (MANPRINT) Assessment for the Basic Hand Emplaced Wide Area Munition (Basic HE-WAM), XM93, and the Basic HE-WAM Individual (XM98) and Collective XM97) Training Devices. U.S. Army Research Laboratory, Attn: AMSRD-ARL-HR, Human Research and Engineering Directorate, Aberdeen Proving Ground, Maryland.
- Gunn, K. (1999). Manpower and Personnel Integration (MANPRINT) Assessment for the Military Operations on Urbanized Terrain (MOUT) Fuze (Fuze, Point Detonating/Delay, Mk399 MOD1 for Artillery MOUT Applications). U.S. Army Research Laboratory, Attn: AMSRD-ARL-HR, Human Research and Engineering Directorate, Aberdeen Proving Ground, Maryland.
- Gunn, K. (1999). Manpower and Personnel Integration (MANPRINT) Assessment for the XM151/XM152 Det Cord Components of the Modernized Demolition Initiators (MDI) System. U.S. Army Research Laboratory, Attn: AMSRD-ARL-HR, Human Research and Engineering Directorate, Aberdeen Proving Ground, Maryland.
- Gunn, K. (2000). Manpower and Personnel Integration (MANPRINT) Assessment for the Cartridge, 120mm, KE-WA1 for Foreign Military Sale to the Government of Egypt (GOE). U.S. Army Research Laboratory, Attn: AMSRD-ARL-HR, Human Research and Engineering Directorate, Aberdeen Proving Ground, Maryland.
- Gunn, K. (2000). Manpower and Personnel Integration (MANPRINT) Assessment for the M762E1/M767E1 Electronic Time Artillery Fuze (ETAF). U.S. Army Research Laboratory, Attn: AMSRD-ARL-HR, Human Research and Engineering Directorate, Aberdeen Proving Ground, Maryland.

- Gunn, K. (2001). Manpower and Personnel Integration (MANPRINT) Assessment for the Cartridge, 60mm Mortar WP Smoke (M722E1, with the XM783 Point Detonating (PD) Fuze. U.S. Army Research Laboratory, Attn: AMSRD-ARL-HR, Human Research and Engineering Directorate, Aberdeen Proving Ground, Maryland.
- Gunn, K. (2001). Manpower and Personnel Integration (MANPRINT) Assessment for the Cartridge, 81mm Mortar, Infrared Illuminating, XM816. 1 May 2001. U.S. Army Research Laboratory, Attn: AMSRD-ARL-HR, Human Research and Engineering Directorate, Aberdeen Proving Ground, Maryland.
- Gunn, K. (2001). Manpower and Personnel Integration (MANPRINT) Assessment for the Demolition Kit, Breaching System, Anti-Personnel Obstacle, Mk 7 Mod 1 (Anti-Personnel Obstacle Breaching System - APOBS). 8 April 2001. U.S. Army Research Laboratory, Attn: AMSRD-ARL-HR, Human Research and Engineering Directorate, Aberdeen Proving Ground, Maryland.
- Gunn, K. (2001). Manpower and Personnel Integration (MANPRINT) Assessment for the Insensitive Cartridge, 60mm Mortar HE (M720E1), with the M734A1 Multi-Option Fuze. U.S. Army Research Laboratory, Attn: AMSRD-ARL-HR, Human Research and Engineering Directorate, Aberdeen Proving Ground, Maryland.
- Gunn, K. (2001). Manpower and Personnel Integration (MANPRINT) Assessment for the Insensitive Cartridge, 60mm Mortar HE (XM768), with the XM783 Point Detonating (PD) Fuze. U.S. Army Research Laboratory, Attn: AMSRD-ARL-HR, Human Research and Engineering Directorate, Aberdeen Proving Ground, Maryland.
- Gunn, K. (2001). Manpower and Personnel Integration (MANPRINT) Assessment for the Insensitive Cartridge, 60mm Mortar HE (XM768), with the XM783 Point Detonating (PD) Fuze. 22 June 2001. U.S. Army Research Laboratory, Attn: AMSRD-ARL-HR, Human Research and Engineering Directorate, Aberdeen Proving Ground, Maryland.
- Gunn, K. (2002). Manpower and Personnel Integration (MANPRINT) Assessment for the Advanced Infrared Countermeasure Munitions (AIRCMM). U.S. Army Research Laboratory, Attn: AMSRD-ARL-HR, Human Research and Engineering Directorate, Aberdeen Proving Ground, Maryland.
- Gunn, K. (2003). Manpower and Personnel Integration (MANPRINT) Assessment for the Mortar Fire Control System- Heavy, XM95/XM96 (MFCS-H). U.S. Army Research Laboratory, Attn: AMSRD-ARL-HR, Human Research and Engineering Directorate, Aberdeen Proving Ground, Maryland.
- Gunn, K. (2003). Manpower and Personnel Integration (MANPRINT) Assessment for the XM95/XM96 Mortar Fire Control System (MFCS). U.S. Army Research Laboratory, Attn: AMSRD-ARL-HR, Human Research and Engineering Directorate, Aberdeen Proving Ground, Maryland.
- Gunn, K. (2004). Manpower and Personnel Integration (MANPRINT) Assessment for the XM85 Training Device and the M17 Receiver of the Remote Activation Munition System (RAMS). U.S. Army Research Laboratory, Attn: AMSRD-ARL-HR, Human Research and Engineering Directorate, Aberdeen Proving Ground, Maryland.
- Gunn, K. (2005). Manpower and Personnel Integration (MANPRINT) Assessment for the Firing Device, Demolition: XM153 Time Delay-Sympathetic Detonator (TD-SYDET) and XM316 Trainer Kit. U.S. Army Research Laboratory, Attn: AMSRD-ARL-HR, Human Research and Engineering Directorate, Aberdeen Proving Ground, Maryland.
- Gunn, K. (2005). Manpower and Personnel Integration (MANPRINT) Assessment for the Lightweight Handheld Mortar Ballistic Computer (LHMBC) XM32. U.S. Army Research Laboratory, Attn: AMSRD-ARL-HR, Human Research and Engineering Directorate, Aberdeen Proving Ground, Maryland.
- Gunn, K. (2005). Manpower and Personnel Integration (MANPRINT) Assessment for the Intelligent Munitions System (IMS). Unpublished Report. U.S. Army Research Laboratory, Attn: AMSRD-ARL-HR, Human Research and Engineering Directorate, Aberdeen Proving Ground, Maryland.
- Gunn, K. (2005). Manpower and Personnel Integration (MANPRINT) Assessment for the M313, 120mm Mortar Subcaliber Training Lnsert (81mm Lnsert Program). Unpublished Report. U.S. Army Research Laboratory, Attn: AMSRD-ARL-HR, Human Research and Engineering Directorate, Aberdeen Proving Ground, Maryland.

- Gunn, K. (2006). Manpower and Personnel Integration (MANPRINT) Assessment for the 60mm Mortar Anti-Personnel Anti-Materiel (Mapam) XM1061/XM1046. Unpublished Report. U.S. Army Research Laboratory, Attn: AMSRD-ARL-HR, Human Research and Engineering Directorate, Aberdeen Proving Ground, Maryland.
- Gunn, K. (2006). Manpower and Personnel Integration (MANPRINT) Assessment for the Advanced Infrared Countermeasure Munitions (AIRCMM), Xm211 and Xm212 Flares. Unpublished Report. U.S. Army Research Laboratory, Attn: AMSRD-ARL-HR, Human Research and Engineering Directorate, Aberdeen Proving Ground, Maryland.
- Gunn, K. (2006). Manpower and Personnel Integration (MANPRINT) Assessment for the Cartridge, 120mm, M313, Mortar Subcaliber Training Insert (81mm Insert Program). Unpublished Report. U.S. Army Research Laboratory, Attn: AMSRD-ARL-HR, Human Research and Engineering Directorate, Aberdeen Proving Ground, Maryland.
- Gunn, K. (2006). Manpower and Personnel Integration (MANPRINT) Assessment for the Cartridge, 120mm: High Explosive (HE) M934ale1, with Fuze Multi-Option, M734A1 for Mortars and Pa174 Monopack. Unpublished Report. U.S. Army Research Laboratory, Attn: AMSRD-ARL-HR, Human Research and Engineering Directorate, Aberdeen Proving Ground, Maryland.
- Gunn, K. (2006). Manpower and Personnel Integration (MANPRINT) Assessment for the Magneto Inductive Remote Activation Munition System (MI-RAMS), XM156. Unpublished Report. U.S. Army Research Laboratory, Attn: AMSRD-ARL-HR, Human Research and Engineering Directorate, Aberdeen Proving Ground, Maryland.
- Gunn, K. (2006). Manpower and Personnel Integration (MANPRINT) Assessment for the Spider XM7, Dispensing Set, Network Command Munition (Ncm). Unpublished Report. U.S. Army Research Laboratory, Attn: AMSRD-ARL-HR, Human Research and Engineering Directorate, Aberdeen Proving Ground, Maryland.
- Gunn, K. (2007). Manpower and Personnel Integration (MANPRINT) Assessment for the Cartridge, 120mm Mortar: High Explosive, M933E1. Unpublished Report. U.S. Army Research Laboratory, Attn: AMSRD-ARL-HR, Human Research and Engineering Directorate, Aberdeen Proving Ground, Maryland.
- Gunn, K. (2007). Manpower and Personnel Integration (MANPRINT) Assessment for the Precision Engagement Projectile, 155mm, Excalibur Unitary Projectile (XM982) Block Ia-2, and the Type Classification, Limited Production, and Conditional Materiel Release for Early Fielding of Block Ia-1 to Both the Joint Light Weight 155 Howitzer with Towed Artillery Digitization (M777A2) and the Paladin (M109a6) Platforms Unpublished Report. U.S. Army Research Laboratory, Attn: AMSRD-ARL-HR, Human Research and Engineering Directorate, Aberdeen Proving Ground, Maryland.
- Gunn, K. (2007). Manpower and Personnel Integration (MANPRINT) Assessment for the XM326 120mm Stowage Kit (Quick Stow). Unpublished Report. U.S. Army Research Laboratory, Attn: AMSRD-ARL-HR, Human Research and Engineering Directorate, Aberdeen Proving Ground, Maryland.
- Gunn, K. (2008). Manpower and Personnel Integration (MANPRINT) Assessment for the Magneto Inductive Remote Activation Munition System (MI-RAMS), M156. Unpublished Report. 4. Summary of Volume I.

It has been the intent of this report to consolidate and preserve the historical knowledge contained in previous MANPRINT and MANPRINT related investigations and assessments conducted by the U.S. Army up to the date of this bibliography for use as a reference tool by future MANPRINT practitioners and principal investigators.

This work has become an ongoing labor of love. On the surface one might ask why anyone would become dedicated to such a seemingly endless, monotonous, and voluminous effort. However, anyone who has been the principal investigator (PI) for any type of MANPRINT effort will immediately appreciate the ability to ascertain whether the system to be investigated has been previously looked at and to find a source for that report. When I was such a PI, an effort that was started to compile information regarding previous MANPRINT reports for my own use just seemed to take on a life of its own. The first edition of this work covered MANPRINT Assessment related documents produced for the office of the DA G1 for MANPRINT as governed by AR 602-2. This second edition picks up where the 1st edition left off by completing and updating reviews of DA G1 MANPRINT Assessment documents while adding the general category of MANPRINT reporting in T&E system reports as governed by AR 73 -1. Future editions are planned annually to update this bibliography with new work from both the MANPRINT and T&E communities.
