

COMBAT SUPPORT SYSTEMS

Product Manager, Combat Support Equipment (PdM CSE)

AMAL 653, Corpsman Assault Pack (CAP) and Component Assemblage (CAPCA)

REQUIREMENT

Statement of Need dated 29 September 2006.

OVERVIEW

The Corpsman Assault Pack (CAP) was fielded as part of the Improved Load Bearing Equipment (ILBE) system in 2004. The Corpsman Assault Pack contents, the Corpsman Assault Pack Component Assemblage (CAPCA) was developed by the Integrated Product Team (IPT) chartered to improve first responder capabilities utilizing their experiences in the ongoing OIF/OEF conflict and refined by the Naval Health Research Center. The CAPCA is Tactical Combat Casualty Care (TCCC) compliant and continues to evolve with changing TCCC recommendations. AMAL 653, is designed to be mission-tasked with a variety of Commercial Off the Shelf (COTS) trauma casualty care products for emergent health care delivery in the combat environment. The CAP container is a member of the ILBE system under the Infantry Combat Equipment (ICE) Program Office, and its contents, the CAPCA are under the Family of Field Medical Equipment Team.

FEATURES

The CAP is a system that includes a combat trauma bag and a thigh rig for mission flexibility by the using Corpsman and expedited sustainment of its contents (CAPCA) is accomplished through established Battalion Aid Station AMALs 635 and 636.
