Requirement

MEP ORD for ICCE LOG 42.6.

Overview

The new MarPat Poncho Liner is a part of an ongoing effort to enhance and update Marine Corps' inventory of equipment. Updates, coincides with the Army's new camouflage transition initiative to begin replacing items in its inventory to reflect the Army's new Universal Pattern.

Features

The poncho liner is designed to provide Marines with a lightweight, piece of equipment used as a covering or field blanket in any environment. The poncho liner provides additional comfort and warmth for personnel involved in combat or field operations.
