SECTION SF 30 BLOCK 14 CONTINUATION PAGE

SUMMARY OF CHANGES

The following questions and answers are provided:

Question #1: Will the government be making available complete IMTV & PC samples?

Answer #1: The Government will not be providing standard samples to individual vendors, but will make them available for viewing by Small Business Administration (SBA) Qualified HUBZone Small Business Concerns (see FAR 52.219-3) on **23 and 24 June 2009** at the Marine Corps Systems Command, Quantico Va. These will be the only two dates available for standard sample viewing. The maximum viewing time allotted per vendor will be 1.5 hours. Offerors interested in reviewing the standard samples shall coordinate a time with the contract specialist, Leigh D'Lugos at susan.dlugos.ctr@usmc.mil. A maximum of four (4) individuals per vendor (inclusive of subcontractor personnel) will be permitted to register for a given time slot.

Question #2: The Gerber Accumark files included with the solicitation for both the IMTV & PC are for size medium only. We would like patterns on all sizes, to include the ballistics, for accurate pricing. Are these files available?

Answer #2: PC and IMTV patterns for sizes XS, SM, LG and XL will be provided to Small Business Administration (SBA) Qualified HUBZone Small Business Concerns (see FAR 52.219-3) upon written request. Requests shall be emailed to the contract specialist, Leigh D'Lugos at susan.dlugos.ctr@usmc.mil.

Question #3: The purchase descriptions for the PC and IMTV (Attachments J.1 and J.2) do not define the material for the outer shell and inner shell. The Gerber Accumark patterns, however, define the material as 1000D Cordura for the outer shell and 500D Cordura for the inner shell. Please confirm this is the desired material for the outer and inner shell of the carrier.

Answer #3: Paragraph 3.2.1 in both Purchase Descriptions (Attachment J.1 and J.2 to the solicitation) details the requirements for the outer shell and inner shell for both the Plate Carrier (PC) and the Improved Modular Tactical Vest (IMTV) systems. This paragraph **does not** specify cloth types, only performance requirements for proposed cloths. The reference to 1000D Cordura for the outer shell and 500D Cordura for the inner shell on the size Medium patterns was for Government reference use during sample development; this verbiage has been removed in a revised set of medium patterns that are provided as attachments to this amendment. These patterns replace the patterns originally issued with the solicitation.
